

**GRAYMONT**

## **JOB POSTING**

### **MINE ENGINEER**

**LOCATION:** Pleasant Gap, PA

**COMMENTS ON IMMIGRATION:** If you are applying for a position in another country, please note that the position and your application will have to be considered from an immigration perspective.

#### **DUTIES AND RESPONSIBILITIES:**

Contribute to operational success through mine roof mapping and ground support verification to insure safety for all underground mine personnel. Responsible for planning and updating the long term mine plan.

##### **Safety**

- All areas of the Mine Act and Pennsylvania state standards must be monitored for compliance in the mine planning process. No exceptions can be made in operational practices or compliance to these standards.
- Inspection of roof conditions must be thorough and consistent to insure all hazards are identified.

##### **Engineering**

- Work with mine supervisors and mine geologist to clearly define the mine objectives.
- Develop long and short term mine plans.
- Submit project status reports identifying projects and critical project paths.
- Develop plan for compliance with roof control and roof bolting standards.
- Map underground geological structures.
- Organize and maintain engineering document files.
- Develop relationship with internal engineering support and outside consultants to optimize engineering practices.

#### **QUALIFICATIONS:**

- Two to five years experience in underground mining. Prior knowledge of underground mining with emphasis on mine planning, blasting, haulage, ground control and underground crushing and conveying.
- Bachelor's degree in mining engineering.
- Proven track record of developing and maintaining a safe work culture.
- Proven teambuilding and leadership skills.
- Strong communication and team skills.
- Well organized and able to work independently or as part of a team.
- Computer skills including AutoCad.
- Knowledge of labor relations and bargaining agreements preferred.
