

JOB POSTING

PROCESS ENGINEER

LOCATION: Cricket Mountain, Delta, Utah

COMMENTS ON IMMIGRATION: If you are applying for a position in another country, please note that the position and your application will have to be considered from an immigration perspective.

DUTIES AND RESPONSIBILITIES:

This position is expected to provide engineering support to the maintenance department and operations. The position would be an ideal fit for an ambitious self-starter who wants to learn all areas of the plant operation and promote into other positions. This person may be expected to perform in the following functions:

- Communicate clearly and effectively with all members of the workforce.
- Provide in-house project and process engineering support to maintenance and operations.
- Utilize technology and trouble shooting skills to identify/propose improvements for system bottlenecks.
- Assist the Maintenance department in short and long term maintenance and shut down planning.
- Develop, manage and implement capital projects and major repairs and maintenance projects.
- Coordinate and supervise work provided by contractors and vendors.
- Assist the maintenance department in investigating and finding the root cause of problems causing equipment failure and develop corrective solutions.
- Function as a relief supervisor to assist with coverage for supervisory staff.
- Perform "On call" duties on rotation with the management team.
- Duties may require "hands on" activity in day-to-day plant Environmental compliance issues and reporting.
- Ensure that the highest standards are achieved in the areas of safety, environmental compliance and process efficiency and reliability.

QUALIFIATIONS:

- BS Degree in Engineering or an equivalent combination of education and experience.
- 3 to 5 years experience in lime, cement or an industrial environment.
- Must be an ambitious self starter able to prioritize and manage multiple tasks.
- Must be willing to work extended hours as necessary to meet deadlines or to ensure resolution of plant problems.
- Passionate in the pursuit of implementing process improvements.
- Strong computer skills. PLC programming and or JDE experience is a plus.
- Basic financial management skills (analysis, budgeting, and planning).
