

JOB POSTING

PROCESS ENGINEER

LOCATION: Pleasant Gap, PA

COMMENTS ON IMMIGRATION: If you are applying for a position in another country, please note that the position and your application will have to be considered from an immigration perspective.

DUTIES AND RESPONSIBILITIES:

This position is expected to provide the skills to ensure that the process group effectively fulfils its duties and responsibilities as outlined in the attached Charter.

- As a team member of the Graymont Process Engineering Group identify, develop, continuously improve and communicate the best available process practices developed within Graymont and available outside.
- Provide plant assistance on process issues including the identification and application of continuous improvement opportunities including efficiency, quality and emissions related activities.
- Participate in the development of project concepts, flow sheets, equipment specifications and layouts that incorporate Graymont and industry best practices.
- Provide assistance to support any permitting.
- Use and share process calculation, control, and simulation tools for kilns, crushing, screening, hydrators and PCC processes.
- Prepare and maintain operating manuals and deliver training.

QUALIFICATIONS:

- BS Engineering.
- 3 to 5 years experience in lime, cement or similar industries.
- Strong computer skills.
- Demonstrated aptitude and learning ability in pyro processing and process control applications.
- Self starter with very strong teamwork and communication skills.
- Comfortable in a shared service and “customer oriented” environment.
